Assignment 14: Corporate website content and structure planning

<https://github.com/elovric13/eutech/tree/corporate-website-content-and-structure-planning-elovric13>

1. Choose a type of organization

The selected organization is Grbić d.o.o., a Croatian family business based in Požega, Slavonia, specializing in the production of cold-pressed pumpkin seed oil and other natural food products.

2. Define:

- **The purpose of the website:**

To present Grbić d.o.o. as a company, showcase their pumpkin seed oil products, share the story and tradition behind the business, and educate visitors about the quality, origin, and uses of cold-pressed pumpkin seed oil.

- **The target audience:**

Existing customers, individual buyers, health-conscious and organic-food enthusiasts, potential distributors, and anyone looking for detailed information about the company or its products.

- **The main objectives of the website:**

Build brand awareness and establish an online presence

Reach new customers and markets beyond the existing buyer base

Provide a reliable information source about the company, products, and production process

Make it easy for distributors and buyers to get in touch

3. Create a sitemap

Home

About Us

Products

Shop

News

Contact

4. For each page, explain: its purpose, the information that should be included, the multimedia elements required (images, videos, icons, etc.).

Home

- **Purpose:**

To create an immediate strong impression of Grbić d.o.o. as a premium, trustworthy family business rooted in Slavonian tradition. A visitor should understand within seconds what the company sells, where it comes from, and why the product is special.

- **Information to include**

Hero section with a strong headline and a single CTA button ("Explore our products")

Short brand statement: family origin, Slavonia, tradition, quality

Featured products section: 3 highlight products with photo and brief description

Trust-builder: years in business, number of export countries, certifications (BIO, Halal)

Latest news preview: 2-3 most recent posts

Wholesale/distributor CTA strip: "Interested in wholesale? Get in touch."

- **Multimedia elements**

Hero image – high quality photo of the product in a natural/rustic setting (fields, wooden table, natural light)

Product photos – clean, professional shots of the bottles and packaging

Trust icons – certification badges (BIO, Halal, EU fund)

News thumbnails

About us

- **Purpose**

To tell the story of Grbić d.o.o. in a way that builds trust and emotional connection. A visitor who lands here wants to know who is behind the product, where it comes from, and why they should believe in the quality.

- **Information to include**

Company origin story – founder, rooted in Slavonia, now led by the next generation

The region – why Slavonia matters, the soil, the nature, Park prirode Papuk

Production process – how the oil is made, cold-pressed, controlled conditions, traditional methods

Quality and certifications – BIO certification, Halal certificate, EU-funded projects

Key numbers – years in business, export countries, product range

- **Multimedia elements**

Family photo or portrait

Photos of the fields

Photos or short video of the production process

Certification badge images

Possibly a timeline showing the company's milestones

Products

- **Purpose**

To present the full product range in a clear and appealing way, giving visitors enough information to understand what each product is, what makes it special, and how to order it.

- **Information to include**

Short intro paragraph explaining the product philosophy: natural, controlled production, Slavonian origin

All products listed with name, short description, available packaging sizes, and product type (BIO, premium, standard)

A note directing wholesale buyers to the Contact page

A subtle CTA linking to the Shop for individual purchases

- **Multimedia elements**

Clean product photos for each item - consistent background, professional lighting

BIO or quality badge icons next to relevant products

Possibly a short description of ingredients or health benefits for each product

Shop

- **Purpose**

To allow individual customers to browse and purchase Grbić products online

- **Information to include**

All products listed with photo, name, short description, available sizes, and price

Add to cart functionality

Filter or sort options – by product type, by BIO/standard

Shipping information – delivery countries, estimated time, costs

- **Multimedia elements**

High quality product photos

BIO and quality badge icons

Cart and checkout icons

News

- **Purpose**

To keep visitors informed about company updates, media appearances, events, and educational content about pumpkin seed oil and healthy eating.

- **Information to include**

Company news – new products, certifications, awards, fair appearances

Media appearances – articles or features

Educational posts – health benefits of pumpkin seed oil, recipes, production insights

- **Multimedia elements**

Thumbnail image for each post

Category tags or filters – News, Media, Recipes, Education

Social share buttons on individual posts

Contact

- **Purpose**

To make it as easy for any type of visitor to get in touch – an individual customer with a question, a wholesale buyer, a distributor, or a journalist.

- **Information to include**

Contact form – name, email, subject, message

Phone numbers and email address displayed clearly

Physical address

Working hours

- **Multimedia elements**

Google Maps embed showing the location

Small icons for phone, email, address, working hours

5. Write sample content

- **Homepage introduction**

Grbić d.o.o. is a family business rooted in the fertile soil of Slavonia, Croatia, with over 30 years of experience in producing premium quality pumpkin seed oil and other natural food products. What started as a small family farm has grown into one of the most recognizable names in cold-pressed pumpkin seed oil production in the region, but our values have never changed. We still grow our own pumpkins, press our own oil, and stand behind every bottle we produce.

Our pumpkin seed oil is made from carefully selected seeds grown under controlled conditions in the clean air and rich soil of the Požega-Slavonia County, in the shadow of Papuk Nature Park. We use cold-pressing techniques that preserve the natural ratio of vitamins, minerals, and unsaturated fatty acids that make pumpkin seed oil one of nature's most powerful superfoods. No additives, no shortcuts, no compromises.

We produce both conventional and certified BIO products, holding certifications including BIO and Halal, and we export to over 10 countries across Europe. Whether you are a long-time customer, a first-time visitor, or a distributor looking for a reliable partner, welcome to Grbić. We are glad you found us.

- **About Us page**

Grbić d.o.o. was founded in 1991 by Ivan Grbić, a graduate agronomist with a vision of building a food production company grounded in quality, tradition, and respect for nature. Starting from a family farm in Požega, Slavonia, Ivan built the business from the ground up through decades of hard work, agricultural knowledge, and an uncompromising commitment to the quality of every product that left the farm.

Today the company is led by his daughter Nives Lovrić, who continues the family legacy while bringing fresh vision and energy to the brand. Under her leadership, Grbić has expanded its product range, strengthened its export network, and invested in modern production facilities, all while staying true to the values that Ivan established from the very beginning.

Our products are grown and produced entirely in Slavonia, one of Croatia's most fertile agricultural regions. The pumpkins used for our oils are cultivated on our own fields and in cooperation with small local producers who share our commitment to quality. The seeds are dried using biomass energy and cold-pressed to produce oil of exceptional nutritional value.

We hold BIO and Halal certifications and have received support from EU funds for regional development. Our products are sold across Croatia and exported to more than 10 countries, including Germany, Austria, Japan, and the United States. We are proud of where we come from and proud of what we make.

- **Three product descriptions**

Premium pumpkin seed oil

Our premium pumpkin seed oil is the flagship product of Grbić d.o.o. and the result of over three decades of refined production expertise. It is made from high-quality pumpkin seeds grown under controlled conditions and cold-pressed at low temperatures to preserve the full nutritional profile of the oil. Rich in vitamin E, potassium, phosphorus, and unsaturated fatty acids including linoleic and oleic acid, this oil is as good for your health as it is for your kitchen. It has a deep, dark green colour, a distinctive nutty aroma, and a flavour that elevates any dish it touches, from salads to soups to desserts. Available in 0.25 l and 0.50 l bottles.

BIO premium pumpkin seed oil

Our BIO premium pumpkin seed oil is produced from seeds grown on the slopes of Papuk Nature Park, one of Croatia's most pristine natural environments. The entire production process is certified organic and supervised by an accredited body authorized by the Croatian Ministry of Agriculture. We use the Gleisdorf shell-free pumpkin variety, known for its exceptionally high oil yield and rich nutritional content. This oil carries all the health benefits of our standard Premium oil, antioxidant properties, heart health support, anti-inflammatory effects, with the added assurance of fully certified

organic production. If you are looking for the purest expression of what pumpkin seed oil can be, this is it. Available in 0.25 l and 0.10 l bottles."

Salted pumpkin seeds

Our salted pumpkin seeds are proof that the simplest things are often the best. Dried seeds from our own pumpkins are gently heated in a traditional bread oven with up to three percent salt, developing a distinctive roasted flavor and irresistible aroma that is hard to forget. They are an exceptionally nutritious snack, rich in protein, healthy fats, zinc, and magnesium, and suitable for all ages in moderate quantities. They work just as well as a standalone snack as they do as a garnish, scattered over salads, soups, cakes, or ice cream for a satisfying crunch. Also available in a certified BIO version for those who prefer fully organic. Available in 0.10 kg and 0.50 kg packaging."

6. Explain how visitors will navigate through the website and how the menu structure will improve usability.

The website uses a simple top navigation bar visible on every page, so visitors always know where they are and can move freely between sections without using the back button. The navigation is flat, meaning there are no drop-down menus or hidden sub-pages, which keeps the experience clean and intuitive for all types of visitors.

Usability details:

- Navigation stays fixed at the top while scrolling
- Active page is visually highlighted, so visitors always know where they are
- On mobile the menu collapses into a hamburger icon
- Language switcher (HR / EN / DE) sits separately in the top right corner
